

Dual Shield 7100SR

Dual Shield 7100SR is an all-position gas shielded flux cored wire with an unique balanced formulation to produce superior mechanical properties and excellent operator appeal. The flux cored wire is designed for both as-welded and post-weld heat treatment applications. The wire is formulated to provide excellent impact toughness down to -46°C and has extremely low weld metal diffusible hydrogen levels of less than 4.0 ml/100g. Excellent wet-in action of a weld puddle produces flatter to a slight convex weld bead profile for easy slag detachment.
